

EcoCart AI

AI-powered checkout assistant for sustainable e-commerce.

Problem

Online retailers lose margin and loyalty because shoppers want greener delivery choices but current checkout flows hide carbon impact and shipping tradeoffs.

Product

EcoCart AI is a Shopify and WooCommerce plugin that recommends lower-carbon delivery options, bundles orders intelligently, and explains the emissions savings to shoppers in real time.

Market Size

We estimate a \$12.4B global sustainable e-commerce enablement market, including carbon accounting, green logistics software, and conversion optimization tools for online retailers.

Team

Founder and CEO Maya Torres previously led growth analytics at Shopify. CTO Leo Martin is an ex-Google machine learning engineer with 8 years of recommendation systems experience. Advisor panel includes a former DHL sustainability director.

Traction

In the last 90 days, EcoCart AI reached 42 paying merchants, \$38K MRR, 18 percent month-over-month revenue growth, and pilots with two enterprise retailers. The product has influenced 1.2M checkout sessions.

Business Model

SaaS pricing starts at \$299 per month plus a usage-based fee on optimized checkout sessions.
